

COVID-19 SAFETY PLAN

A. Jobsite Protective Measures

Carter Construction Partners, Inc. has instituted the following protective measures at all jobsites.

General Safety Policies & Rules

- ProjectsitesandtradepartnerswilldevelopandimplementaCOVID-19Site-Specific Safety Plan that addresses the specific protective measures applicable to their project.
- For safety meetings and Task Hazard Analysis Meetings (THA) conducted in-person, attendance will be collected verbally and or video record/photographed, and supervision will sign-in each attendee. Utilize megaphones and or speaker systems to broadcast the safety meetings over a large area for all to hear while maintaining social distancing. Attendance will not be tracked through passed-around sign-in sheets or mobile devices.
During any in-person safety meetings, avoid gathering in groups of more than 10 people and participants must remain at least six (6) feet apart.
- Only 4 workers (3 workers plus the operator) will be allowed in a man/material hoist at one time to maintain social distancing, unless spacing in the hoist allows otherwise.
- Crews should be brought in early or stay late to utilize man/material hoist for material loading/unloading so the man/material hoist can be better utilized by personnel during normal work hours.
- All in-person meetings will be limited to only those deemed essential. To the extent possible, meetings will be conducted by video conferencing or telephone. All in-person meetings shall be limited to less than ten (10) people.
- Jobsites, if possible, shall establish permanent hand washing stations with running potable water.
- For jobsite hand washing stations that do not have access to running water, Carter Construction Partners, Inc. will provide, if available, alcohol-based hands sanitizers and/or wipes.
- Anyone that answers “yes” to any of the following questions, he/she should not be permitted to access the jobsite:
 - Have you, or anyone in your residence, come into close contact (within 6 feet) with someone who has a suspected or confirmed COVID-19 diagnosis in the past 14 days either at home or on a jobsite, etc.?
 - Are you experiencing a new or sudden onset of any of the following symptoms: fever or chills, cough, shortness of breath or difficulty breathing, new loss of taste or smell, muscle or body aches, headache, sore throat, diarrhea, congestion or runny nose, nausea or vomiting, and/or fatigue?
 - Are you experiencing a fever above 100.4 F, or have you in the last 24 hours?

B. Jobsite Visitors

- The project site shall limit jobsite visitors to only those deemed essential.
- All visitors will be screened in advance of arriving on the job site. If the visitor answers “yes” to any of the following questions, he/she should not be permitted to access the jobsite:
 - Have you, or anyone in your residence, come into close contact (within 6 feet) with someone who has a suspected or confirmed COVID-19 diagnosis in the past 14 days either at home or on jobsite, etc.?
 - Are you experiencing a new or sudden onset of any of the following symptoms: fever or chills, cough, shortness of breath or difficulty breathing, new loss of taste or smell, muscle or body aches, headache, sore throat, diarrhea, congestion or runny nose, nausea or vomiting, and/or fatigue?
 - Are you experiencing a fever above 100.4 F, or have you in the last 24 hours?
- Site deliveries will be permitted but should be properly coordinated in line with the employer’s minimal contact and cleaning protocols.

C. Personal Protective Equipment & Work Practice Controls

- In addition to regular PPE for workers engaged in various tasks (fall protection, hard hats, hearing protection), the following PPE requirements apply:
 - Gloves shall always be worn while on-site. The type of glove worn should be appropriate to the task. Employees should avoid sharing gloves. Be aware that general work gloves will not protect you from COVID-19. It is important to maintain good personal hygiene while wearing gloves. Avoid touching your face and wash your hands once gloves are removed.
 - Eye protection shall always be worn while on-site.
 - Jobsite Cleaning & Disinfecting
- Jobsite trailers and break/lunchroom areas will be cleaned at least once per day. Employees performing cleaning will be issued proper personal protective equipment (“PPE”), such as nitrile, latex, or vinyl gloves and gowns, as recommended by the CDC.
- Any trash collected from the jobsite must be changed frequently by someone wearing nitrile, latex, or vinyl gloves.
- Implement and maintain our Keep it Clean Keep it Safe Housekeeping Program to reduce dust levels on the jobsite
- Any portable jobsite toilets should be cleaned a minimum twice per week and disinfected on the inside. Carter Construction Partners, Inc. will ensure that hand sanitizer dispensers are always filled.
- Frequently touched items (i.e. door pulls and toilet seats) will be disinfected frequently.
- Vehicles and equipment/tools should be cleaned at least once per day and before change in operator or rider.
- Carter Construction Partners, Inc. will maintain disinfectant supplies at the jobsite. Examples of these are:
 - Common EPA-registered household disinfectants
 - Alcohol solution with at least 60% alcohol; or
 - Diluted household bleach solutions (these can be used if appropriate for the surface).
- Carter Construction Partners, Inc. will maintain Safety Data Sheets of all disinfectants used on site.
